

Vcheck (SSNet, Inc.) is pleased to finally announce a new strategic partnership with one of the leading providers of credit / debit card merchant accounts that specialize in working with municipalities and insurance agencies as well as any business that accepts deposits or issues billings or invoices.

Vcheck has been in business since 1996, and in that time numerous merchant account providers have approached us to reach our customers. We have always declined because it would not have been a win-win situation for our own customers. After much negotiation, we feel that Systems East can now provide that win-win relationship we always strive to achieve.

Systems East can provide merchant accounts to most types of businesses, but is among the few providers that have a system where payment interest and/or processing fees are automatically added to amounts due. This aspect is vital for situations where the net deposit of the transaction must be a specific amount.

Some of the many, many features that Systems East offers are highlighted to the right. Systems East has an online payment gateway second to none, along with shopping cart integration and a payments via telephone system. **HOWEVER, the most valuable part of this new alliance, is that the annual fees for all this spectacular technology will be waived for Vcheck customers.** This amounts to a huge savings – part of the win-win offer we negotiated for you, along with very low merchant fees, discounts and a credit card processing system that is technically superior to anything else we have seen.

So, if you are looking for a new (or a better deal on) credit card processing, log into your Vcheck account and click on the link by the credit card images for more information and/or application forms.

Imagine a single credit card collection solution for every need. Our 25 years of experience is reflected in our unrivaled combination of features, including:

Posted bills with amounts and interest per your schedule—fee structure may be applied to reduce merchant costs.

FlexPay bills allow in-person or Internet payments of any amount.

Inventory sales to allow customers to select and purchase items from your inventory.

Email notification feature alerts past visitors of new or outstanding invoices as you post them.

Magnetic credit card stripe readers further expedite payments made in person.

Access all system features with your enrollment - no additional modules to pay for.

24-hour availability: Allows customers to conveniently purchase or pay at any time from any location.

Incorporates Internet standards to increase security and customer participation. A receipt is presented on-screen and delivered by email.

Very low discount or transaction fees—let's us compare with you current provider.
